Request Information
Request Description
Patients should have access to a library of instructional exercise videos tailored to their treatment plan.
Justification
Providing patients with instructional exercise videos can lead to improved outcome for their treatment. Also since patients are able to access high quality instructional videos they will feel more confident in rehabilitation and so they can be more satisfied with their care.
Effect if declined (Risk if the project request is declined)
Patients may experience slower progress in their rehabilitation. Patients might feel frustrated from rehabilitation. If it is hard for patients to reach rehabilitation sessions it is crucial to have instructional videos.
