Request Information
Request Description
The reports of patients and questionnaires of patients should be prepared in pdf format.
Justification
PDF format is supported on many devices and applications. PDF files are easy to customize and easier to highlight key observations. PDF format preserves the original document formatting, layout, and fonts, ensuring that reports and questionnaires retain their integrity and readability across different platforms
Effect if declined (Risk if the project request is declined)
Using other formats for the file may cause limited edit and customization for the files. Since PDF format is commonly used, using another format file may not work on different devices as much as PDF file. And using other file types can cause more vulnerabilities for users or for the system to crash.
Request Alternatives (if exists)

Request Review Information		
Review Date	Reviewer Name and Signature	Reviewer Conclusion
